

SPORTS FIELD ROLLER

SFR660

Rear roller dimension of 2000x900mm combining with a wall thickness of 28mm that has been fully machined with radius edges mounted on 60mm precision bearings allowing you the perfect result.

Front Rollers are in 3 section with a wall thickness of 10mm that has also been fully machined combined with the unique hydraulic steering makes manoeuvring this roller a breeze.

Front and Rear roller scrapers are standard with optional scraper trays for unwanted clip collection.

Huge sun shade with fully adjustable height and sides to allow maximum shade whilst rolling.

Exceptional operator viewing area from the adjustable suspension seat with a swivel base to maximise vision.

Easy operator controls with fixed and variable speed settings to suit any rolling speed and high speed traversing.

Total dry weight of standard roller is 2800kg and up to 4000kg water ballasted, other weight options are available if required.

Weight dispersion is key to the MowMaster SFR660 Sports Field Roller at 78% over the main roller means maximum down pressure.

Powered by the ever reliable Honda 25HP V—Twin engine combined with our bullet proof Hydraulic transmission allows operating travel speed of up to 10 - 12 kms p/hr
